GitHub Account:<https://github.com/SaraSalah1>

OBJECTIVE

To obtain a full-time position as a Front-End Developer to build, develop, and maintain modern web applications. I specialize in creating responsive and dynamic user interfaces. With strong expertise in **React.js**, **JavaScript (ES6+)**, and modern UI frameworks like **Tailwind CSS** and **Material-UI**, I thrive on delivering intuitive, interactive, and visually appealing web experiences.

EDUCATION

Bachelor of Computer Science

Minor: Computer Science

DEVELOPER SKILLS

- React.js & JavaScript (ES6+)
- Tailwind CSS & Material-UI
- HTML5 & CSS3
- Authentication & Forms
- State Management & Routing

RELEVANT EXPERIENCE

| | |
|--------------------|----------------------|
| Frontend Developer | July 2025 – Nov 2025 |
| Company | Egypt, Nasr city |

PERSONAL PROJECTS

React ChatGPT Interface => React.js, JavaScript, Tailwind CSS, Material UI

- A modern React app that mimics a ChatGPT interface. Features advice API integration, dropdown menus, login/signup modal, and responsive UI.

Gemini Clone => React.js, JavaScript, CSS

- A responsive chat app inspired by Gemini/ChatGPT. Includes sidebar for previous chats, dynamic message bubbles, and Context API state management.

React Student Management System => React.js, JavaScript, Tailwind CSS, Material UI

- A student management system with authentication. Users can add, edit, delete, and select students. Includes responsive login page and editable table with localStorage persistence.

React Student Table => React.js, JavaScript, Tailwind CSS, HTML

- A dynamic student table supporting add, edit, delete, search, and filter operations. Features checkbox selection for multiple students and responsive design.

React To-Do List => React.js, JavaScript, HTML, CSS

- A task management app allowing users to add, delete, and clear tasks. Stores data in LocalStorage with responsive layout and smooth UI animations.
